Date: _____ Name of Trap Renter: _____
Address: _____ City: _____ State: _____ Zip: _____
Phone number: _____ Email: _____
Address where trap will be located: _____ How many cats in colony: _____

Are you interested in volunteering with this program? We have needs that vary from one-time-only help to regular commitments! (circle one) Yes No

I take custody and responsibility for the item(s) listed below, for the purpose of humanely trapping and altering or providing veterinary care to cat(s) that are living in the area I am familiar with, and that to the best of my knowledge are not claimed by any person, after having made good faith efforts to locate any possible owners. I understand that I will be charged \$75 per trap if I do not return the trap or request a loan extension on or before the scheduled return date. That permits the HSC to replace the trap and continue the program.

I recognize the demand for traps is high, so I will use the trap(s) efficiently and in a timely manner. By signing below, I also agree to:

Read thoroughly the provided Trapping Guidelines.

Plan ahead so the cat spends as little time as possible in the trap before being taken to the vet. The cat should never spend more than 24 hours in the trap without water.

Keep cat under observation, with food and water, after veterinary surgery or treatment per veterinarian's recommendation to ensure the cat is recovering appropriately before the cat is released.

Never loan or share the trap with another party.

*Traps are for TNR or clinic purposes only. After surgery, the cat must be returned to the location he/she was caught. **Traps are not to be used to surrender cats to animal control.***

Return traps and other equipment within 10 days of loan date unless other date has been set below. Loans may be renewed in person, by email, or over the phone. Renewals should be requested on or before the scheduled return date.

If an animal is accidentally trapped that does not qualify for our program, such as an already ear-tipped cat or wildlife, you must release it immediately at the same location.
